- Heated massage in the comfort of your own home
- Easy to use home care kit with step by step guide for massage
- Enhancing touch therapy
- Gentle heat to release general aches and pains
- Lava Shells are self-heating and require no electricity

Lava Shell Homecare Kit contains: 1 shell, 4 LavaGel sachets and activators, botanical massage oil and an instruction and massage advise booklet.

What the experts say:

"The treatment was amazing - one of the best I have had, and I've had a few! I loved the texture and heat of the shells, which I felt allowed for some really deep work, especially around the stomach area which often lacks this special attention in massages. I left feeling totally shifted in mind and body." **Jill Cartwright, Women's Fitness Writer**

"Lava Shells are among the most innovative products in the spa today with this cutting edge technology I see virtually no limits to the application of this product." **Spa Director**

"This is hands-down the best treatment I've had."
Victoria Stewart, Evening Standard Features Writer

Lava Shell massages can be found in leading salons and spas across the world, for more information please contact
